Scale Intelligent Business Decisions

CloudHealth is the most trusted cloud management platform used to accelerate business transformation in the cloud.

Customers are adopting multiple clouds to gain agility, flexibility, and control. However, financial management, governance, and security compliance become key areas of concern as cloud usage grows. Don’t let these concerns slow down your time to market and increase your costs.

Thousands of customers around the world depend on CloudHealth to support their current and future business goals. The platform gives you the ability to optimize, secure, and govern the largest and most complex multicloud environments.

Who is CloudHealth for?
- Finance
- IT Ops / Tech Ops / Cloud Ops
- Engineering / App Dev
- Enterprise Architects
- C-Level Executives

INCREASE AGILITY
Deliver higher quality products and solutions faster, while keeping costs under control and reducing complexity. With complete visibility into spend, you can confidently control your cloud journey.

IMPROVE COLLABORATION
Align business units and departments to make decisions faster. Drive consistent best practices throughout your organization for increased productivity, improved collaboration, and communication.

DRIVE INNOVATION
Spend more time on innovation, less time on menial tasks. With CloudHealth, you can set guardrails to be notified, or take automated action, when infrastructure violates policy.
How the Platform Works

CloudHealth ingests and aggregates data from cloud providers, containerized or on-premises environments, and third-party integration tools, to become your single source of truth for multicloud management.

Visualize and report
Categorize and view your assets by logical business groupings to discover trends and drive accountability

Optimize and recommend
Get actionable recommendations to manage reservations and Savings Plans, rightsize assets, and more

Govern via policies
Configure rules to execute custom workflows based on guidelines you define

Automate actions
Stop, start, resize, or terminate infrastructure, send alerts, and schedule events

“Prior to CloudHealth, we had been reactionary, but we are now proactive and able to effectively manage our cloud environment in ways never before thought possible.”

ANEES IQBAL
Senior Director of Cloud Services, VMware
Services Beyond the Platform

CloudHealth by VMware provides a world-class cloud success service, including training and education, onboarding, ongoing enablement, and technical support. We also offer professional services that help you accomplish tasks that you don’t have the time and resources for internally, while taking your cloud governance and optimization to the next level. “As a company grows, CloudHealth is right there with you. The team does a fantastic job putting recommendations into action” says Jeannie Finks, Strategic and Technical Operations Director, Strategic PMO at Acquia.

“CloudHealth can be used by people who understand business needs, and by those who understand technology.”

SANDEEP KULKARNI
Vice President of Information Technology, Icertis
